

Tank Cleaning

Many veteran motorcycles owners know that upon closer inspection, a petrol tank can show the effects of time and suffer from the effects of rust.

The firm Escher has come up with a solution for resolving the problem. The petrol tank is first washed and rinsed. It is then sprayed with large particle spray, followed with a fine glass spray to ensure that every little crack is cleared of rust. The tank is then coated with 2 component epoxy resin.

Complete price per Guzzitank

139,- €

For heavily rusted tanks

Complete price per Guzzitank

270,- €

For heavily rusted tanks, farther work is needed
And the services of a special firm are required.
